Introduction

It is a proficient Dynamics CRM Plugin called “Custom Auto Numbering” which helps to auto increment numbers to CRM records for any entity easily. Custom Auto Numbering plug-in allows automatic generation of unique numbers for all entities across the CRM system. The format of the custom auto number can be customized to suit the business requirements.

Benefits of Custom Auto Numbering

- It helps to auto increment numbers to CRM records for any entity easily.
- The format of Auto Numbering can be customized according to business requirements.
- Here, there can be automatic generation of unique numbers for all entities across the System.

Pre-requisites

Following points must be followed before starting the Plugin installation:

- You must be logged into Dynamics CRM Online.

Installation and Configuration

Installation Steps

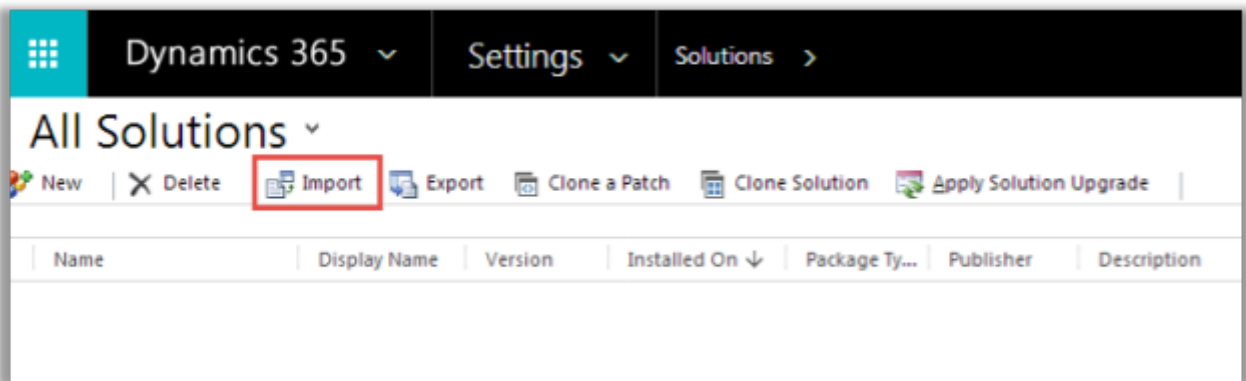

To install 'Custom Auto Numbering' plugin, the following steps has to be followed:

- On downloading the plugin, you will get a zip file named CustomAutoNumbering_managed_v2.0.zip.

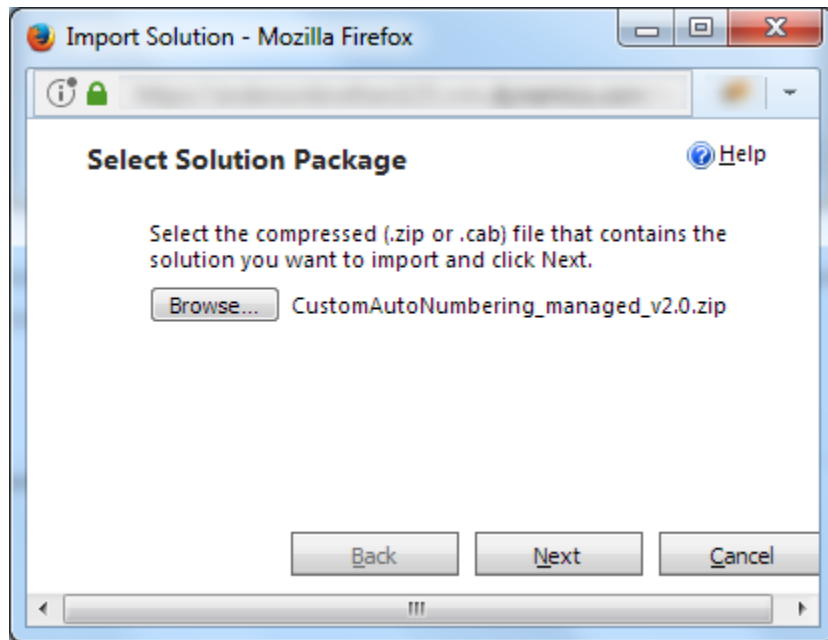

CustomAutoNumbering_managed_v2.0.zip

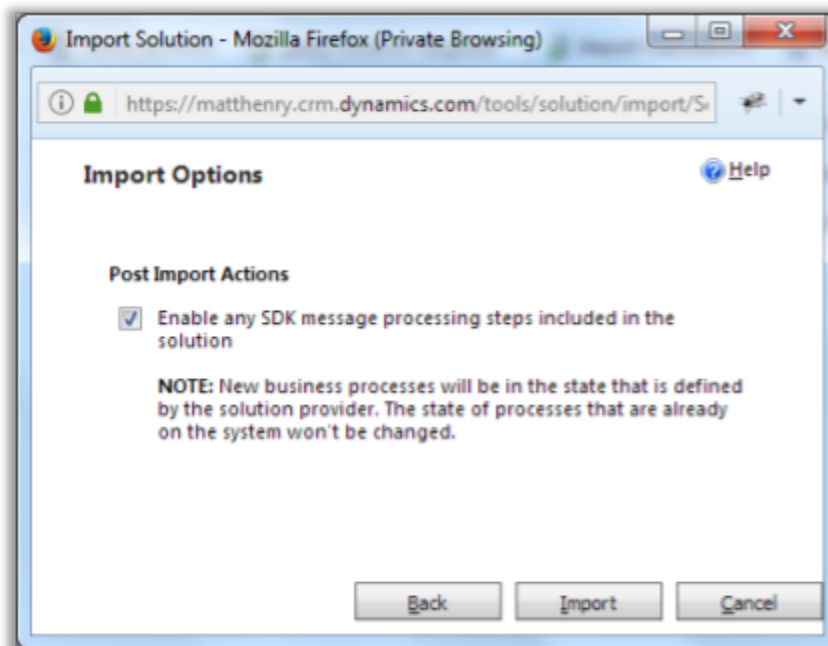

- Login to your CRM Account and click on **Settings ->solutions**

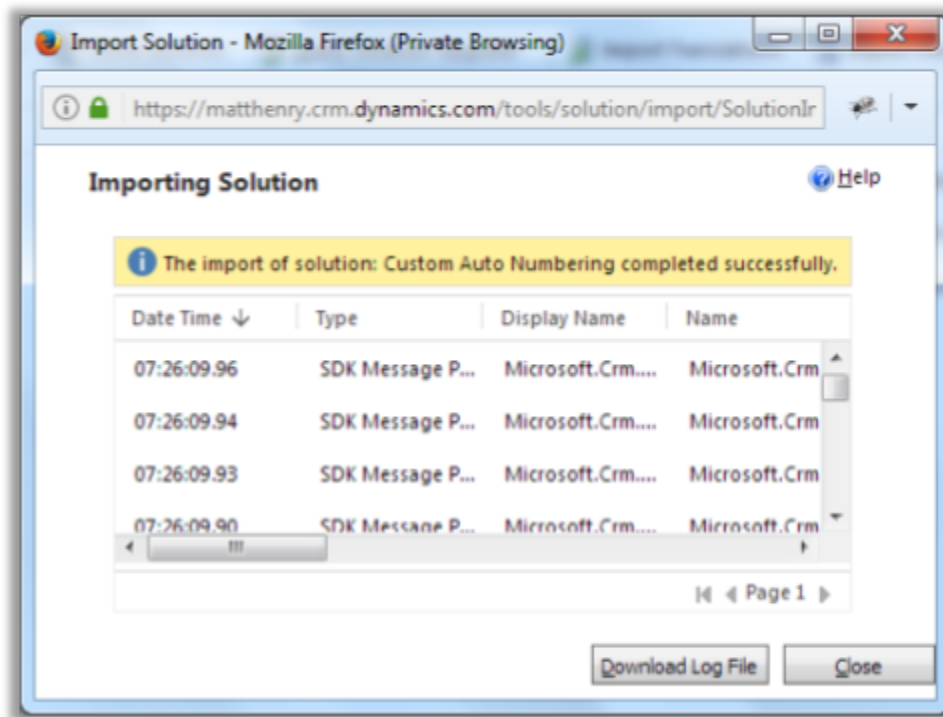

- Click on '**Import**' to upload and install the Solution.
- Click on Browse button and choose the Package Zip File for Custom Auto Numbering from the Import Solution Window.

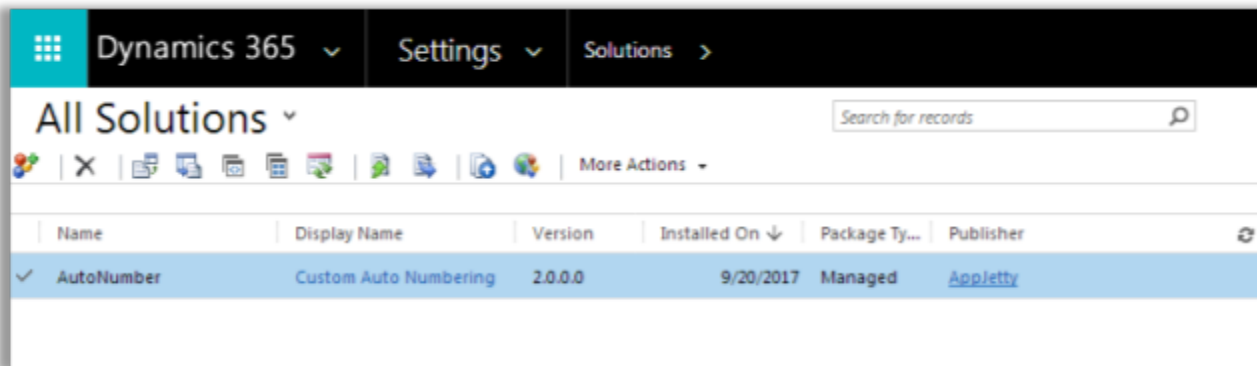

- Click on 'Next' for further processing.

- Check the box to enable any SDK message processing steps included in the solution and click on Import button to Import the Solution

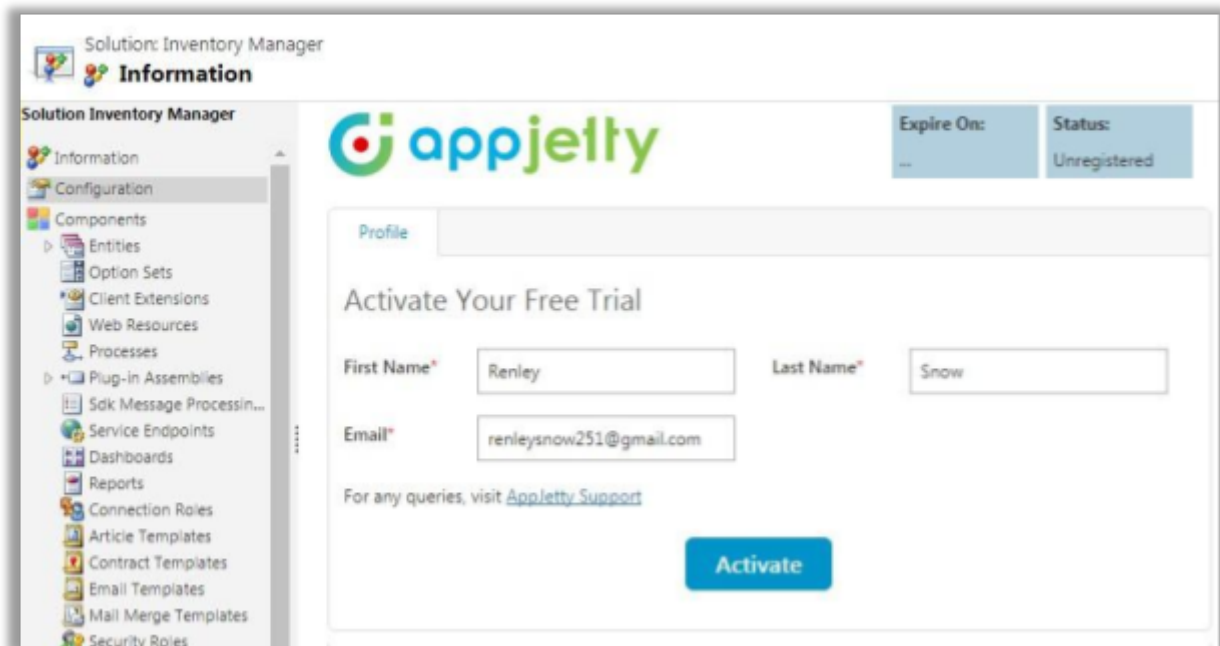

- Click on 'Close' after successful completion message is displayed

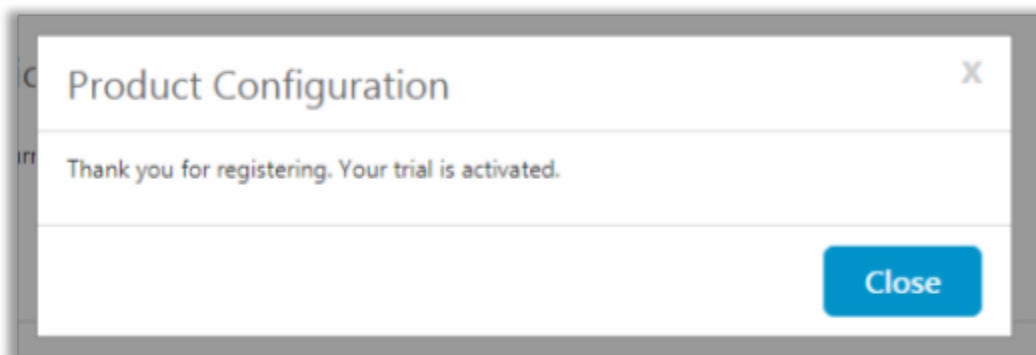

- Once you import the solution, it will be displayed in the solutions grid view.

Configuration Steps

- Double click on 'Custom Auto Numbering' solution to configure the plugin with your license key
- This will open up a new window. Click on 'Configuration' from the options provided on the left side.

- You can activate your one-month free trial.
- To get a 15 Days free trial license key, fill out the details and click on 'Activate' button.

- Your trial will get activated and the expiry date will be displayed on top.

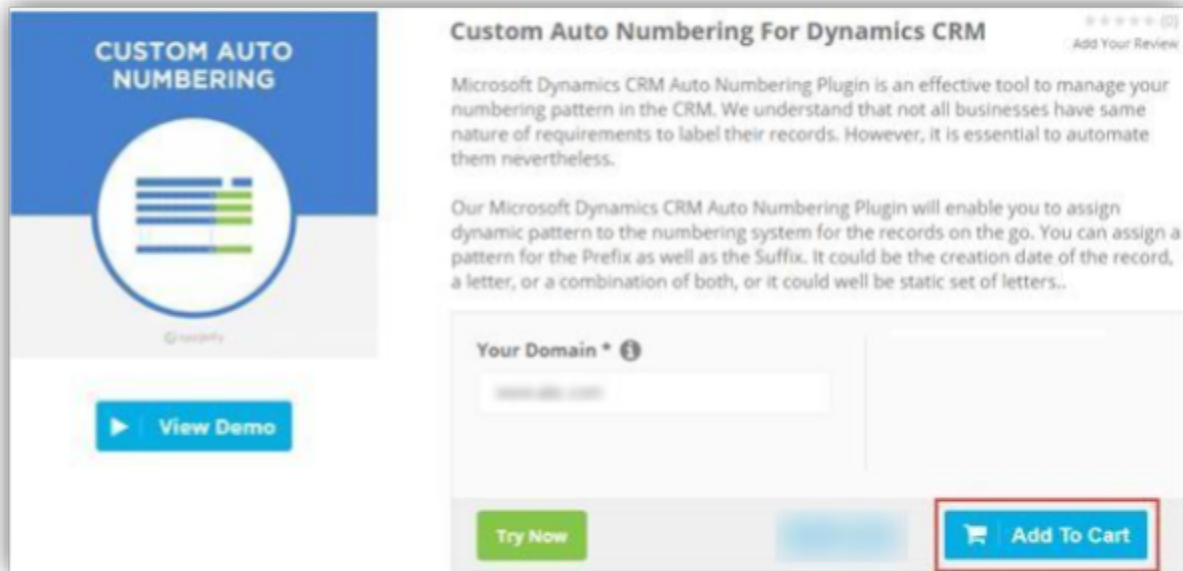

The screenshot shows the AppJetty user interface. At the top left is the AppJetty logo. At the top right, there are two boxes: 'Expires On: 1/6/2018' and 'Status: Trial'. Below the logo is a navigation bar with 'Profile' and 'Setup' tabs. The main heading is 'Purchase License'. Below it, a message states: 'Your free trial is currently active. You can purchase the plugin anytime by clicking on the below button.' A blue 'Buy Now' button is centered. Below this is a section titled 'License Details' with a 'License Key:' label and a text input field containing a blurred license key. A green message below the input field reads: 'Your free trial will expire in 30 day(s)'. A note below that says: 'Note: This is not real time information and will be updated in the next 24 hours.' At the bottom, it says: 'For any queries, visit AppJetty Support'.

- You can purchase the licensed version any time. To purchase the license, click on 'Buy Now' button.

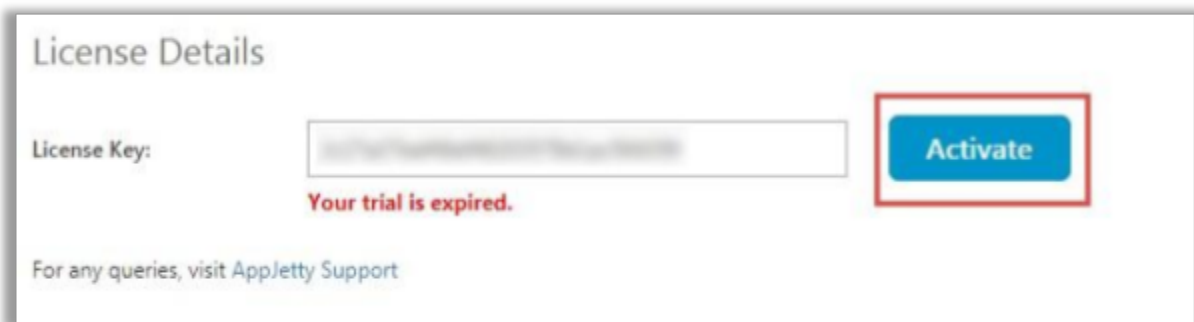

The screenshot shows the AppJetty user interface. At the top left is the AppJetty logo. At the top right, there are two boxes: 'Expires On: 12/5/2017' and 'Status: Trial-Expired'. Below the logo is a navigation bar with 'Profile' and 'Setup' tabs. The main heading is 'Purchase License'. Below it, a message states: 'Your free trial is expired. You can purchase the plugin anytime by clicking on the below button.' A blue 'Buy Now' button is centered. Below this is a section titled 'License Details' with a 'License Key:' label and a text input field containing a blurred license key. A red message below the input field reads: 'Your trial is expired.'. At the bottom, it says: 'For any queries, visit AppJetty Support'.

USER MANUAL - Dynamics CRM Custom Auto Numbering

- On expiration of Trial a message will appear that the Trail is expired. Now to purchase the license click on the '**Buy Now**' button.
- This will redirect you to our product page and a pop-up will appear. Click on '**Add to Cart**' button and complete the purchase process.

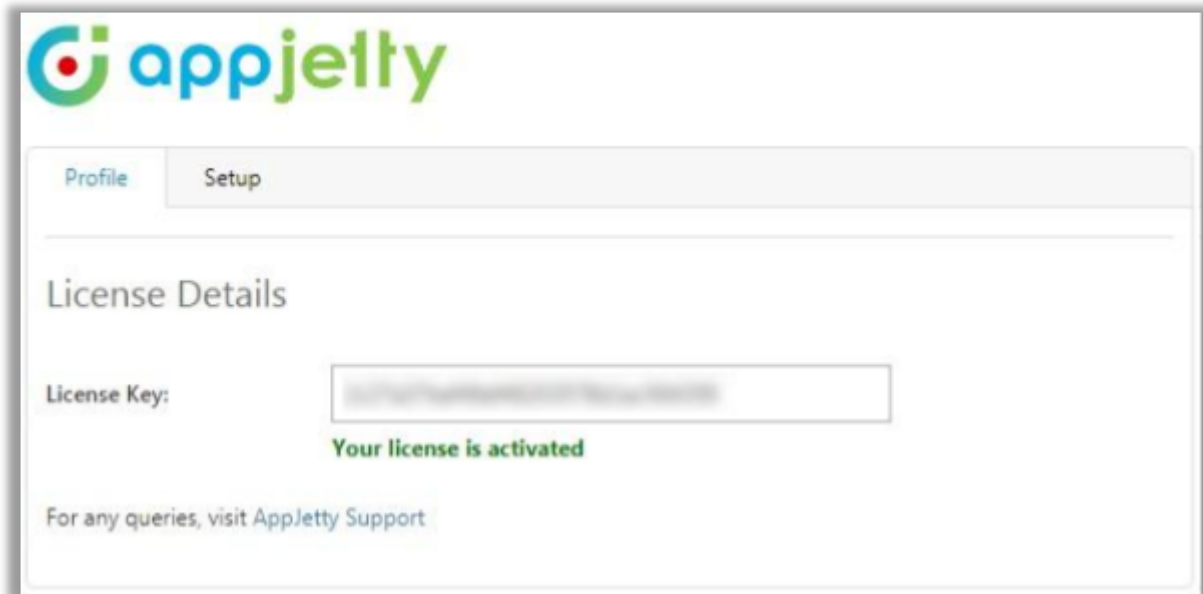

- On successfully completing the purchase process, you will receive your license key via email along with steps to complete the license configuration.

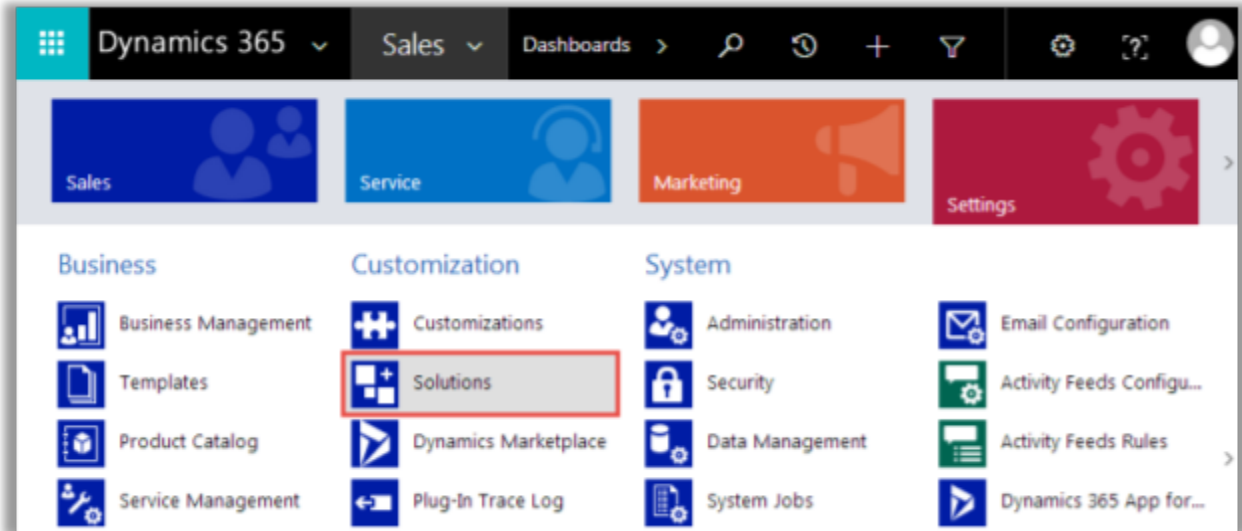

USER MANUAL - Dynamics CRM Custom Auto Numbering

- Enter the New License key received on mail. This will enable the **'Activate'** button.
- Click on **'Activate'** button to activate your license.

Procedure

- In order to start numbering your entities you need to create Custom Auto Numbering Configuration record so that each time a new record is created, the field value which you have set increases by one.
- To configure Custom Auto Numbering, Go to **Settings ->Solutions**.

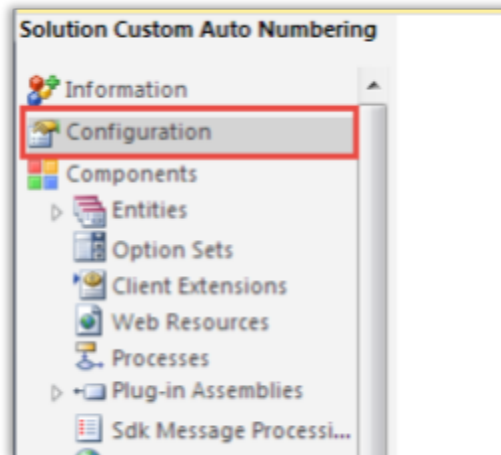

- Click on the Plug-in **Display Name** to configure the Plug-in and you will be redirected to the Configuration Page.

The screenshot shows the 'All Solutions' page in Dynamics 365. The page title is 'All Solutions' with a dropdown arrow. Below the title, there is a toolbar with various icons and a 'More Actions' dropdown. The main content is a table with the following columns: Name, Display Name, Version, Installed On, Package Ty..., and Publisher. The 'Display Name' column for the 'AutoNumber' solution is highlighted with a red box.

Name	Display Name	Version	Installed On	Package Ty...	Publisher
AutoNumber	Custom Auto Numbering	2.0.0.0	9/15/2017	Managed	AppJetty

- Click on "Configuration" Tab on the Left Side Panel of the Page.

- There are 3 sections in configuration.
 1. General Settings
 2. Prefix Settings
 3. Suffix Settings

Note: If the length of auto generated field exceeds maximum character limit of the chosen entity field then you need to increase the character limit of that field

- In general settings, User has to select **Entity** from list of entity and particular field related to that entity. Selected field will be updated with specific Prefix and Suffix.

USER MANUAL - Dynamics CRM Custom Auto Numbering

- Auto number will be start from **Start Position** with Prefix and Suffix configured.
- Auto Increment By uses for auto number which is incremented by value specified in '**Auto Increment By**' field newly created record in CRM.
- **Current Position** shows the current position of auto number.
- Main **separator** will be used to separate auto number from Prefix and Suffix. It would appear after Prefix and before suffix.
- **Max Length** is the maximum value of entity field, if you want to extend the max length Go to **Settings -> Customization -> Entities** and select appropriate entity for which you want to change max length.
- If '**Is Active**' is selected then configuration would be updated in selected field of entity otherwise configuration would be saved.

Prefix Settings

The screenshot shows the 'Prefix' configuration window. It contains the following fields and options:

- Prefix Text**: Text input field containing 'ACC'.
- Entity Field**: Dropdown menu showing 'Address 1: City'.
- Entity Characters**: Dropdown menu showing '2'.
- Include Date**: Radio buttons for 'Yes' (selected) and 'No'.
- Date Format**: Three dropdown menus for 'DD', 'MM', and 'YY'.
- Prefix Separator**: Dropdown menu showing '-'.
- Date Separator**: Radio buttons for 'Yes' (selected) and 'No', followed by a dropdown menu showing '/'.

- The **Prefix configuration** will be added before Auto Number.
- Value of prefix field will be added in starting of prefix portion.
- **Prefix Text** field value will be a static value added before the Auto Number and after the main separator.
- **“Entity Characters”** will define number of characters taken from value of prefix entity field.

USER MANUAL - Dynamics CRM Custom Auto Numbering

- If user want to add date with prefix then select Yes from “**Include Date**” and user can select any combination of date format from dropdown.
- **Prefix Separator** comes after prefix field value and before prefix date. Only if added from prefix value and prefix date, Otherwise Prefix Separator will not be displayed.
- **Date Separator** will appear between date format i.e. between date, month, year.

Suffix Settings

The screenshot shows the 'Suffix' configuration window. It contains the following fields and options:

- Suffix Text**: Text input field containing 'ACC'.
- Entity Field**: Dropdown menu showing 'Stock Exchange'.
- Entity Characters**: Dropdown menu showing '5'.
- Include Date**: Radio buttons for 'Yes' (selected) and 'No'.
- Date Format**: Three dropdown menus for date format, showing '-', 'MM', and 'YY'.
- Suffix Separator**: Dropdown menu showing ':'.
- Date Separator**: Radio buttons for 'Yes' (selected) and 'No', followed by a dropdown menu showing '/'.

- The **Suffix configuration** will be added after Auto Number.
- Value of prefix field will be added in starting of suffix portion.
- **Suffix Text** field value will be a static value added after the Auto Number and before the main separator.
- “**Entity Characters**” will define number of characters taken from value of suffix entity field.
- If user want to add date with suffix then select Yes from “**Include Date**” and user can select any combination of date format from dropdown.
- **Suffix Separator** comes after prefix field value and before prefix date. Only if added from prefix value and prefix date, Otherwise Prefix Separator will not be displayed.
- **Date Separator** will appear between date format i.e. between date, month, year.
- Preview will display the format how Auto Number will be generated.

Save Reset

USER MANUAL - Dynamics CRM Custom Auto Numbering

- On clicking the 'Save' button a pop up will appear with confirmation message. Click on 'OK' and it will be added to configuration grid.

- The new record will be saved and listed as shown below. All the Configuration Records for Auto Numbering will get listed here.

The screenshot shows the Appjetty Setup page. At the top left is the Appjetty logo. Below it are tabs for "Profile" and "Setup". The main content is a table with the following columns: Action, Name, Entity, Field, and IsActive. The table contains four rows of configuration records. Below the table is a pagination bar showing "Showing 1 to 4 of 4 entries" and "Previous 1 Next". At the bottom left is an "Add" button, and at the bottom right is a checkbox for "Error Log Tracking" which is checked.

Action	Name	Entity	Field	IsActive
 	AutoNumber For Account	Account	Account Number	Yes
 	AutoNumber For Order	Order	Bill To City	No
 	AutoNumber For Opportunity	Opportunity	Proposed Solution	No
 	AutoNumber For Product	Product	Product ID	No

- Click on 'Edit' option from action, it will redirect to detail view of a configured entity.
- To deactivate Auto Numbering Rule on an entity, uncheck 'Is Active' field. It will deactivate Auto Numbering Rule on that entity.

NOTE:

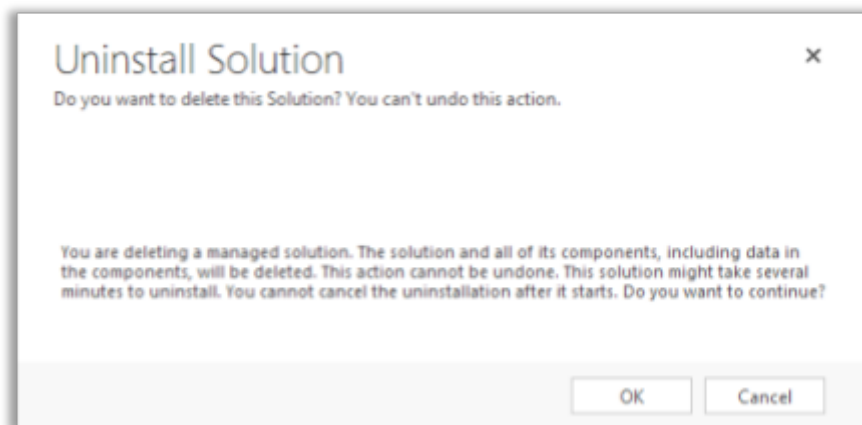

- The first record created after establishing the auto numbering rule will be assigned a number greater than the current position.
- In case the Minimum Number Length is bigger than the length of the number on the current position field, the specified field will start with zeros in order to bridge the gap.
- If the length of auto generated field exceeds maximum character limit of the chosen entity field, then you need to increase the character limit of that entity field by navigating to **Settings -> Customization -> Entities**.

Un-installation Steps

- To uninstall the Solution, navigate to **Settings -> Solutions**
- Check on the Plugin Name and click on 'Delete'

- Click on 'OK' to Delete and uninstall the solution from CRM.
